Docket No. 98-N-1265  
FDA  
Rockville, MD 20857

I oppose the draft M.O.U being proposed by the FDA. In particular, I object to the definition of "inordinate amount" which restricts the availability and the right to obtain medically compounded medications by limiting the number of prescriptions that can be shipped across state lines from specialized compounding pharmacies.

Please do not restrict a woman's right to choose the health care she and her licensed medical doctor agree is best for her. Why in heaven's name was this even brought forward? It seems nothing to do with health concerns; only the economic concerns of mega pharmaceutical companies. I would think what public support for large pharmaceutical companies existed, would be eroded by the latest news on the vitamin cartel. Please, I truly would like to know what the justification for the M.O.U is from the FDA perspective.
